

Town of Whitewood

Lagoon Upgrades Project

This project is funded in part by the Investing in Canada Infrastructure Program. This project aims to:

- Increase the Town's capacity to treat and manage wastewater.
- Mitigate the seepage issues and reduce pollutants in the groundwater.
- Improve the overall performance of the lagoon.
- Eliminate perched water surrounding the lagoon site.
- Improve effluent quality to reduce the impact on the natural environment.
- Reduce chemical use and costs.
- Reduce odour emissions.

Total Project Costs:
\$3,210,000
